#### Management's Discussion and Analysis

#### Overview

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956, guidelines issued by the Securities and Exchange Board of India (SEBI) and the Generally Accepted Accounting Principles (GAAP) in India. Our managements accept responsibility for the integrity and objectivity of these financial statements, as well as for the various estimates and judgments used therein. The estimates and judgments relating to the financial statements have been made on a prudent and reasonable basis, so that the financial statements reflect in a true and fair manner the form and substance of transactions, and reasonably present our state of affairs, profit and cash flows for the year.

#### A. Industry Structure and Developments

Changing economic and business conditions, evolving consumer preference, rapid technological innovation and adoption, and globalization are driving corporation to transform the manner in which they operate. Companies are now more focused on their core business objectives, such as revenue growth, profitability and asset efficiency. GDP of the country is expected to grow at 7% financial year 2012-13 and with good monsoon; GDP in agricultural sector is expected to grow by 3%. However, there are serious concerns in short term industrial outlook and industry is slowing down. As the inflation has also remained very high at steep increase in fuel prices will result in lower spending for purchase of goods across the industries. The automobile industry cannot remain isolated. It is future expected that the industrial output growth is likely to remain subdued in 2012-13 owing to tighter monetary policies and weak external demand. Moderation in industrial production, rise in interest rates, fuel prices and other transporter cost is pressurizing profitability of fleet operators and is consequently expected to lead to lower CV demand for FY 2012 & FY 2013, after 2 years of strong growth. With cues of poor global economic scenario, the GDP of India is also expected to grow at a slower pace of 7.1% in FY 2013. Industrial output growth has shown a sharp decline in YTD Apr - Nov FY 2012 growth with an average growth of 3.8% as against an average growth of 8.4% for the period from April-Nov FY 2011.

#### B. Automobile Industry and Trends

The factors such as income growth, consumer confidence, finance availability, increase in commodity prices and stiffening and increase in excise duty has impact on automobile industry across the sector. The overall growth in various segments of automobiles has started showing negative trends for last 2 quarters of FY 2011-12. However growth in retail business and higher growth in rural basis has supported three wheeler industry. The cargo vehicles' segment in last two quarters has shown positive growth of 5.5% and 7.7% in FY 11-12 and passenger vehicle has shown negative trend of 1.4% and 8% in the similar period. Therefore the three wheelers passage and cargo vehicles are showing mix trends of growth. In FY 12-13 cargo segment is expected to grow every quarter at the average rater of 3% whereas passengers' vehicles are expected to grow at average rate of 7 to 8 % per quarter. The overall industry of three wheelers is likely to be approx half million vehicles annually.

#### C. Evaluation of technology

Consciousness of regulator and environment awareness of the consumers coupled with impending rise of diesel prices. The industries may also look at eco friendly vehicles. Psychology of domestic users towards minimum cost per km for fuel and maintains would be the diving factors in this market.
